WISH NAKTHONG

Aspiring AI Engineer | Location: Bangkok, Thailand
Phone: 095-536-5491 | Email: wishercarts@gmail.com
LinkedIn: linkedin.com/in/wish-nakthong
GitHub: github.com/WISHERCARTS | Portfolio: my-portfolio-wish.vercel.app

- **Relevant Coursework**: Machine Learning, Data Structures & Algorithms, Databases, Operating Systems, Computer Networks. In progress: Cloud Computing, Practical DevOps, Fundamentals of Data Science.

EXPERIENCE

AI Agent Builder Intern @ Botnoi Group **May 2026 - July 2026**

- Built the frontend of a travel app for hidden places in Japan (React, TypeScript, Tailwind, Leaflet), with Supabase Auth, a real database, maps and notifications.
- Connected Botnoi's real-time voice avatar to a Next.js trip planner so the agent can fill in forms and move between pages.
- Built the RAG chatbot for Local Soul, our team's AI travel companion: vector search over places and the Typhoon LLM, connected to Botnoi's chat widget.

Google Student Ambassador (GSA) 2026 Batch1 - Thailand **February 2026 – July 2026**

- **Technical Facilitator (Google Cloud AI Live + Labs):** Guided over 160 attendees in hands-on codelabs focusing on Multi-Agent Systems, Agent Development Kit (ADK), and Agent Runtime.
- **Tech Advocacy:** Created technical content (videos/blogs) on integrating AI into coding

PROJECT

Thai RAG Agents (github.com/WISHERCARTs/thai-rag-agents)

- Built a coordinator, researcher and fact-checker agent system on Google ADK with per-call tracing; on 20 questions it answered 17 correctly and refused all 3 unanswerable ones.
- A second run, after one instruction change, made every answer cite its sources (10/17 to 17/17) and ran the fact checker on all answerable questions; accuracy stayed at 17/20.

LINE AI Chatbot (github.com/WISHERCARTs/line-ai-chatbot-gemini)

- Thai LINE bot on FastAPI and Gemini; 17 pytest tests, Docker, CI, deployed on Google Cloud Run.

Thai RAG with Evaluation (github.com/WISHERCARTs/thai-rag-eval)

- Thai Q&A over 40 Wikipedia articles (1,698 chunks); compared BM25, vector and hybrid retrieval on 80 questions: vector found the source passage in the top 3 for 100% vs 95% for BM25.
- Answered "not found" on 10/10 out-of-corpus questions; fixed a wrong reference answer and a lenient judge found by reviewing every miss.

Face Recognition System (github.com/WISHERCARTs/face-recognition-system)

- PCA (~3,000 to 150 features) and an SVM tuned with GridSearchCV reached 85-90% accuracy on LFW; deployed as a Streamlit app.

Tournament Hub (tournamenthubth.vercel.app)

- Live platform for MU Esports (20 teams, 60 matches): five bracket formats, Valorant pick/ban rooms, live results; PostgreSQL RLS access rules, 71 merged PRs.

CERTIFICATE

Google:
- Gemini Academy (Feb 2026)

Google Cloud:
- Core Infrastructure (2026)

AWS Academy:
- Cloud Foundations (2026)

EDUCATION

June 2024 - Present (Expected graduation: 2028)

Bachelor of Science in Information and Communication Technology
Program: Digital Science and Technology
Mahidol University | GPA: 2.73

SKILLS

- **Languages**: Thai (Native), English.
- **Core**: Python (NumPy, Pandas, Scikit-learn, Matplotlib), SQL, JavaScript, TypeScript
- **Web**: React, Next.js, FastAPI, Node.js, Tailwind CSS, Streamlit
- **AI & Cloud**: Google ADK, Gemini API, RAG evaluation, Cloud Run, Secret Manager, Supabase.
- **Tools**: Docker, GitHub Actions, Git/GitHub, Postman, Vercel, n8n, LINE Messaging API, Figma
- **Familiar with**: Java, R, ESP32, MySQL
