WISH NAKTHONG

Aspiring AI Engineer | Location: Bangkok, Thailand
Phone: 095-536-5491 | Email: wishercarts@gmail.com
LinkedIn: linkedin.com/in/wish-nakthong
GitHub: github.com/WISHERCARTS | Portfolio: my-portfolio-wish.vercel.app

- **Relevant Coursework**: Machine Learning, Data Structures & Algorithms, Databases, Operating Systems, Computer Networks. In progress: Cloud Computing, Practical DevOps, Fundamentals of Data Science.

EXPERIENCE

AI Agent Builder Intern @ Botnoi Group **May 2026 - July 2026**

- Developed a full-stack tourist recommendation chatbot named Local Soul
- Managed databases and geolocation functionality utilizing Supabase.
- Designed chatbot workflows with Mermaid and integrated AI agents into a Smart Parking Web Dashboard.

Google Student Ambassador (GSA) 2026 Batch1 - Thailand **March 2026 – May 2026**

- **Technical Facilitator (Google Cloud AI Live + Labs):** Guided over 160 attendees in hands-on codelabs focusing on Multi-Agent Systems, Agent Development Kit (ADK), and Agent Runtime.
- **AI Literacy & Productivity:** Leveraged Google Gemini and prompt engineering to debug React/Node.js, generate assets, and optimize workflows.
- **Tech Advocacy:** Created technical content (videos/blogs) to educate peers on integrating AI into coding.

PROJECT

Thai RAG Agents

- Built a coordinator, researcher and fact-checker agent system on Google ADK with per-call tracing; on 20 questions it answered 17 correctly and refused all 3 unanswerable ones.
- A second run, after one instruction change, made every answer cite its sources (10/17 to 17/17) and ran the fact checker on all answerable questions; accuracy stayed at 17/20.

LINE AI Chatbot

- Thai LINE bot on FastAPI and Gemini; 17 pytest tests, Docker, CI, deployed on Google Cloud Run.

Thai RAG with Evaluation

- Thai Q&A over 40 Wikipedia articles (1,698 chunks); compared BM25, vector and hybrid retrieval on 80 questions: vector found the source passage in the top 3 for 100% vs 95% for BM25.
- Answered "not found" on 10/10 out-of-corpus questions; fixed a wrong reference answer and a lenient judge found by reviewing every miss.

Face Recognition System

- PCA (~3,000 to 150 features) and an SVM tuned with GridSearchCV reached 85-90% accuracy on the LFW dataset; deployed as a Streamlit web app.

Tournament Hub

- Built a tournament platform for the MU Esports club: five bracket formats, Valorant map pick/ban rooms and live public results; bracket logic and access rules in PostgreSQL (RLS), 24 merged PRs.

CERTIFICATE

Google:
- Gemini Academy (Feb 2026)

Google Cloud:
- Core Infrastructure

AWS Academy:
- Cloud Foundations (2026)

EDUCATION

June 2024 - Now

Bachelor of Science in Information and Communication Technology
Program: Digital Science and Technology
Mahidol University

SKILLS

- **Languages:** Thai (Native), English.
- **Programming Skills**: Python (NumPy, Pandas, Scikit-learn, Matplotlib), Streamlit, R, SQL, Java, HTML/CSS, JavaScript, TypeScript, Go, Node.js, Next.js, React, FastAPI, Tailwind CSS.
- **AI & Cloud**: Google ADK, Gemini API, RAG evaluation, Cloud Run, Secret Manager, Supabase.
- **Tools & Platforms**: Docker, GitHub Actions, LINE Messaging API, ESP32, n8n, Figma, UML (Notion, draw.io), VSCode, MySQL, GitHub, Oracle VirtualBox (Ubuntu), Vercel, Postman.
